

DINESH R

Software Trainee • Python Developer • IoT Enthusiast

📍 Salem, Tamil Nadu 📞 9791769422 ✉ dineshrdineshr517@gmail.com 💼 [linkedin.com/in/dinesh-r-9a9508279](https://www.linkedin.com/in/dinesh-r-9a9508279)

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science Engineering graduate (CGPA: 8.1) seeking a Trainee position at Wipro to leverage hands-on project experience in Python, image processing, IoT, and web technologies. Adept at building real-world solutions under guidance, eager to learn enterprise-level software development practices, and committed to delivering quality outcomes in a team-driven environment.

EDUCATION

Institution	Qualification	Year / Score
AVS College of Technology	B.E – Computer Science	2025 8.1 CGPA
Muthayammal Polytechnic College	Diploma – Engineering	2022 95.2%
CSI Higher Secondary School	SSLC	2019 64.8%

TECHNICAL & SOFT SKILLS

Technical Skills

- ▶ Python (Core Logic, OpenCV, Scripting)
- ▶ Web – HTML5, CSS3
- ▶ Database – MySQL
- ▶ IoT – Arduino IDE, Firebase
- ▶ Tools – Anaconda, VS Code
- ▶ Swift (Currently Learning)

Soft Skills

- ▶ Critical Thinking & Analytical Problem Solving
- ▶ Team Collaboration & Leadership
- ▶ Adaptability & Fast Learning
- ▶ Effective Communication

Languages Spoken

- ▶ Tamil | English | Sourashtra

PROJECTS

Real-Time Automatic Traffic Control | [Python](#) • [OpenCV](#) • [Anaconda](#)

Designed an image-processing system that analyzes live CCTV feeds to dynamically control traffic signals, reducing congestion in real time.

- ▶ Implemented vehicle density detection using OpenCV frame analysis
- ▶ Programmed adaptive signal timing based on lane-wise traffic count
- ▶ Reduced simulated wait time by intelligently prioritizing high-traffic lanes

Automatic Certificate Generator | [Python](#) • [OpenCV](#) • [Pillow](#)

Built a bulk certificate generation tool that automates text placement and styling on predefined templates, eliminating manual effort.

- ▶ Reads participant data from CSV and merges onto certificate templates
- ▶ Supports custom font, size, and position configuration per event
- ▶ Reduced certificate generation time from hours to seconds for large batches

Trap Card Login – RFID-Based Access Control | [Arduino IDE](#) • [Firebase](#) • [RFID Sensors](#)

Developed a secure IoT-based authentication system using RFID cards, with real-time data sync to Firebase for access monitoring.

- ▶ Integrated RFID reader with Firebase Realtime Database for log management
- ▶ Implemented access control logic with instant accept/deny feedback
- ▶ Designed admin dashboard view for monitoring entry/exit events

Autonomous Speaking Robot | [Arduino IDE](#) • [IoT](#) • [Speech Recognition](#)

Built a voice-interactive autonomous robot using IoT modules and speech recognition, capable of real-time conversational responses.

- ▶ Integrated Google Speech API for real-time voice command recognition
- ▶ Programmed motion logic and obstacle avoidance via Arduino
- ▶ Enabled two-way speech interaction for human-robot communication

INTERNSHIP & CERTIFICATIONS

Web Development Intern | [TechForge](#)

- ▶ Developed responsive web pages using HTML, CSS, and JavaScript
- ▶ Collaborated with senior developers to optimize UI performance and user experience
- ▶ Gained exposure to real-world development workflows, version control, and client requirements

INTERESTS

Python Programming ▶ Graphic Design & Logo Creation ▶ Poster & Visual Design ▶ Open Source Exploration
